PROFESSIONAL SUMMARY

I specialize in PostgreSQL database administration, performance tuning, and backup automation. My passion lies in building efficient, secure, and scalable database systems that ensure reliability and optimize performance. I also enjoy creating data-driven dashboards and automation tools that improve decision-making and operational efficiency.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering **Nov 2021 - April 2025**

Dr. Mahalingam College of Engineering and Technology

TECHNICAL SKILLS

- **Database Administration:** Installation, Configuration, Maintenance, and Production DBA Management (PostgreSQL & MySQL)
- **Performance Tuning:** Query Optimization, Indexing, EXPLAIN Analysis, and Execution Plan Review
- **Monitoring & Troubleshooting:** Database Monitoring, Performance Analysis, pg_stat_statements, and Custom Logging
- **Backup, Recovery & Replication:** pg_dump, pg_basebackup, PITR, WAL Archiving, Logical & Physical Replication
- **Automation & Scripting:** pgAgent Jobs, Automated Backups, Batch Scripting
- **Security & Auditing:** pgAudit, Audit Logging, Access Control, and Compliance Monitoring
- **Data Visualization & Reporting:** Power BI Dashboard Design, DAX, Data Modeling, and Reporting Automation
- **Development:** Database Schema Design, Stored Procedures, Functions, and SQL Development

EXPERIENCE

Junior Database Administrator **July 2025 - present**

TBS Technologies Private Ltd, Tiruppur, Tamil Nadu, India

- Administer and maintain PostgreSQL databases to ensure optimal performance, availability, and data integrity across development, testing, and production environments.
- Monitor database performance using pgAdmin, system logs, and performance metrics to proactively detect and resolve bottlenecks.
- Perform database backups, restorations, and security audits with pgAgent and pgAudit, ensuring compliance with internal data protection and audit standards.
- Develop and implement automated backup and monitoring solutions using batch scripting to enhance reliability and reduce manual workload.
- Execute SQL query optimization and index tuning to improve response time, throughput, and overall database scalability.
- Collaborate with application and development teams to design efficient data models and troubleshoot database-driven application issues.

PROJECTS

Custom Audit Logging
Solution Scope: Security compliance requirement implementation
Responsibilities: pgaudit extension modification, DLL compilation, custom logging implementation
Technologies: PostgreSQL, pgaudit, C/C++, Windows, Linux
Outcome: Full compliance with security audit requirements

Auto Backup and Restore System
Solution Scope: Automated database backup and recovery mechanism for PostgreSQL environments
Responsibilities: Designed and implemented batch-scripted automation for scheduled backups, data restoration, and storage path management using pg_dump and pg_restore. Integrated backup scheduling with pgAgent for real-time task execution and monitoring.
Technologies: PostgreSQL, pgAgent, Batch Scripting, Windows Server
Outcome: Achieved a fully automated and reliable backup system, reducing manual maintenance time by over 60% and ensuring data consistency and disaster recovery readiness.

Vehicle Model Analysis Dashboard
Solution Scope: Interactive analytics for vehicle performance and trend visualization
Responsibilities: Dashboard design, DAX measure creation, data modeling, and integration with PostgreSQL
Technologies: Power BI, PostgreSQL
Outcome: Improved decision-making through real-time insights on vehicle trends by fuel type, year, and brand

CERTIFICATIONS

- Python for Beginners – Udemy
- Java (Basic) – HackerRank
- SQL for Beginners – Scaler
- Machine Learning – Udemy

ADDITIONAL INFORMATION

- Strong expertise in SQL performance tuning, query optimization, and database internals.
- Skilled in performing regular backups, restorations, and recovery testing to ensure data integrity and business continuity.
- Proven ability to collaborate effectively with development and DevOps teams for database optimization and troubleshooting.
- Dedicated continuous learner, staying current with the latest PostgreSQL features, community releases, and best practices.

“Ready to bring your ideas to life? Let’s collaborate! Whether you’re a start up or established company,or individual with a vision,i’m here to help from concept to execution,let’s create something amazing together”
